DiscountAmount	Yes	int	Discount Amt, Unit: cents
EnterTime	Yes	long	UTC time (0 time zone)
PayTime	Yes	long	UTC time (0 time zone)
OrderId	Yes	string	Maximum 32 characters

Device Response

```
{
  "State":0,
  "OrderId":"asd455fdgd99898fdgd989fd",
}
```

Field Name	Mandatory	Data Type	Description
State	Yes	int	Deduction results, 0- Success others- Failed
OrderId	Yes	string	The order number carried when requesting. Maximum 32 characters

Instruction

The State here only indicates that the controller has received the deduction request and has performed the operation. It does not indicate the deduction result. The deduction result is returned by another interface (PayResult).
